Media consolidation has made radio unoriginal and boring in the Washington, DC area and across the country. As a result, I subscribe to XM Satellite Radio. Now I find out the National Association of Broadcasters wants to prevent me from getting traffic and weather via XM. This is ridiculous. Is the NAB telling me that I can't even BUY good radio because they have the monopoly on bad radio. If the NAB is allowed to dictate what I can listen to on XM Satellite Radio, than radio is in much worse shape than I thought. Please reject the NAB's petition 04-160.
